ABOUT

Product Manager with 10+ years of experience building and scaling digital platforms across FinTech-adjacent sectors, logistics, mobility, and B2B SaaS. Proven track record of delivering secure, measurable business outcomes — from scaling infrastructure handling 1.5 million monthly transactions to directly contributing to 32% ARR growth. Deeply experienced in technical product management, API infrastructure, and mitigating operational risks. Combines technical grounding with an AI-augmented approach to accelerate discovery and strategic planning. Thrives in remote, globally distributed environments and is passionate about building reliable, user-centric backend and frontend systems.

EXPERIENCE

Product Manager

ASTRNT, Jakarta | *July 2022 – Present*

- Delivered critical onboarding and identity verification features for enterprise accounts, directly contributing to **32% of Annual Recurring Revenue (ARR)** while ensuring compliance with B2B security standards.
- Accelerated product delivery cycles by integrating proactive AI agent workflows to rapidly draft technical PRDs, secure Auth & Session Management architecture use-cases, and Go-To-Market playbooks, reducing documentation turnaround time by **30%**.
- Spearheaded strategic growth initiatives and API integrations to accelerate sales, driving a **15% increase in Sales Qualified Leads (SQLs)**.
- Maintained a strong customer retention rate of **70%** through robust infrastructure reliability and UX improvements.
- Defined and executed product roadmaps, consistently achieving **80% delivery on quarterly goals** in a remote, cross-functional environment.

Product Manager

Qoala, Jakarta | *November 2018 – November 2020*

- Led the integration of advanced AI models to automate risk assessment processes, such as instant travel insurance claims and computer-vision damage assessment, reducing manual review times and mitigating fraud risk.
- Led development for high-volume policy issuance infrastructure, scaling monthly transaction volume from **60,000 to 1.5 million (17×–25×)** while ensuring system stability and data integrity.
- Spearheaded data-driven product strategies, increasing **GMV by 10×**.
- Launched the first international product API integration with a major Bus Ticketing Startup, boosting **transaction volume by 17×** and market presence.

Product Manager

XWORK, Jakarta | *September 2017 – November 2018*

- Led market research and risk analysis to uncover new opportunities, driving product-market fit.
- Streamlined product marketing strategies to align with technical infrastructure development, enhancing overall platform performance.

Product Manager

Porter, Jakarta | *November 2016 – September 2017*

- Collaborated with cross-functional engineering teams to deliver high-quality API products on schedule, aligning roadmap priorities with strategic risk objectives.
- Facilitated stakeholder communication to ensure priorities addressed user needs and operational compliance goals.

Product Management & Sales Operations Coordinator

PegiPegi.com, Jakarta | *July 2012 – January 2016*

- Optimized CRM data infrastructure to enhance contract renewals and streamline sales operations securely.
- Resolved complex operational issues, ensuring compliance with internal guidelines and increasing system efficiency.

EDUCATION

Bachelor of Computer Science

KALBIS Institute, Jakarta | *August 2008 – August 2012*
